Control with Git, Paired Programming

## Education

### Codeup

Certification of Completion

May 2021 - Nov 2021

A fully-immersive, project-based, and intensive 22-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development.

### University of Central Florida

Bachelor of Business

July 2017 - May 2021

Completed four years of undergrad business studies focusing on marketing.

Full Stack Web Developer focused on enhancing user interfaces utilizing consumer behavior and digital marketing strategies. I incorporate front-end technologies to improve accessibility driven by user feedback and back-end logic to optimize functionally for a seamless and holistic experience.

## Development Projects

### Fantasy Basketball

Create your own fantasy basketball team and challenge your friends in leagues with real time scoring. Users are able to register and create a team of the most popular basketball players. With this team they can engage in score based competition based on the performance of the basketball players in their most recent games. This project was created in a team of 4 using HTML, CSS, Bootstrap, MySQL, Spring, and Thymeleaf.

### Adlister Project

Create your own ads and view other's ads in this ad-lister. Users can make an account which is connected to a database to upload, delete, and edit advertisements. This project was created in a team of 3 using MySQL, Java JSP, Servlets, HTML, and OOP.

### Movie Api Project

Update, add, and delete movies in this imdb inspired full-stack website. The user is allowed to edit and delete movies on the website, updating the database in real time. Pair Programming project allowing users access to a movie database to add, delete, and edit entries utilizing HTML, CSS, API, and JavaScript.

### Weather Map Project

Real-Time weather forecast that allows users to navigate locations on a map for the 5-day forecast. Using clicks and a search feature users track the geolocation giving real time weather with OpenWeather. A solo project using HTML, CSS, MapBox, openWeather and Bootstrap to allow users to search their city and have real time weather information.

## Professional Experience

**Walmart** – Oviedo, Florida

*Sales Associate* / Jul 2020 - Apr 2021

- Trained new personnel in inventory controls, product placement & promotion, customer retention.
- Handling several zones while ensuring product is accounted for on the sales floor and on-site services to ensure enhanced customer experience.
- Task management during peak hours; balancing customer service with order preparation.
- Process improvement opportunities to improve customer service.

**Dave and Busters** – Springfield, Virginia

*Dishwasher* / May 2018 – Aug 2018

- Worked in the kitchen handling repetitive tasks of cleaning and stacking dishes.
- Ensured strict sanitation practices were kept for customer safety.
- Helped Dave and Busters provide a quality experience for their customers and increase customer retention.
